

Established: 1985, a privately held limited company with AAA rating*

Products:

- o moisture meters for portable use:
 - o **AK30**: For field use and laboratory, economy on-line
 - o **MK30R** portable deep microwave meter (penetration to 30 mm)
- o moisture meters for continuous use:
 - o **AK40**: For continuous use, economy on-line
 - o **AK50**: For high-speed on-line in scanners and fixed installations
 - o **MK30LP** series on-line deep microwave meter for pulp, paper
- o **FrontColour™10** for full CIE colour measurements on-line with a DCS interface and a full-featured PC program
- o other supporting products available, like power supplies, communications bridges (**LAN232, LAN485**), 4-20 mA converters. A full range of support programs for data acquisition, archiving and reporting for all models for PC

Services:

- o Development of sensor technology and photonic systems: Intelligent sensors with phase-locked signal detection, DSP and complete software, control systems. Subcontracting to manufacture complete modules or products.
- o Signal processing algorithms for DSP and modeling mathematics
- o Electronic design with CAD: analog, digital and microcontroller plus DSP circuits with multilayer boards
