

UJL SAMPLE CUTTER MD/CD

UJL Pty Ltd has introduced a new sample cutter for pulp and paper manufacturers. The UJL-CUTTER can cut strip samples from jumbo or customer rolls. This cutter makes it possible to cut samples safely quickly and accurately, while maintaining ergonomic standards and above all safe work practices. This cutter is suitable for paper machine operators, engineers, maintenance technicians and laboratory testers.

Accurate and uniform paper sample strips are required to define paper check and quality accuracy. The UJL-CUTTER cuts the precise sample width and depth (several paper layers). There are two UJL-SAMPLE CUTTER models available for both machine direction (MD) and cross machine (CD) directions. The models have different operator handles to secure safe and ergonomic sampling work.

Fig. 1 MD sample cut to paper machine

The UJL-CUTTER MD/CD cutters have several unique, safe and sharp blades that smoothly make accurate sample cuts with minimal operator force. Special

safety mechanics prevent the operator from touching the blades when the cutter is not in the use.

Technical specification:

Models

UJL-CUTTER-MD: MD sample strips

UJL-CUTTER-CD : CD sample strips

Standard Dimensions:

Weight: 1.4 kg

Sample width: 75 mm as standard,
50 to 200mm available

Cut depth: up to 6 mm

Material: Steel or Stainless Steel

Safety : Spring loaded protection locking.

Options:

1. Spare cutting knives
2. Customised dimensions
3. Metal transport case
4. Extra handle
