

Established: 1985, a privately held limited company with AAA rating*

Products:

- o IRMA-7TM process moisture meters:
 - o Model A: For laboratory and field use
 - o Models D and DE: For high-speed on-line use in scanners or fixed installations
- o PT-1 temperature transmitter for process conditions. It applies a platinum sensor (Pt100) at the end of a cable to separate the electronics from hot and rough conditions. It contains a PID controller with a an isolated SSR and a serial port. The signal is sent via voltage output and the module is mountable to DIN rail.
- o CapositoTM capacitance transmitter for process data acquisition. It is the ultimate tool for measuring two capacitive sensors simultaneously at a high speed and with superior stability in its own category. This product is for domestic market only at this time.

Services:

- o Development of sensor technology and optics: Intelligent sensors with phase-locked signal detection, DSP and complete software, Profibus DP slaves and control systems. Subcontracting to manufacture complete modules or products.
- o Subcontracting in product design, from concept to product, from idea to full manufacturing
