

# DATA LOGGING SOFTWARE FOR PROCESS METERS

The **Advanced LE** software represents latest software technology. It applies smart multitasking and signal processing to obtain the maximum amount of useful data out of your **IRMA-7** moisture meter or **CAPOSITO** capacitance transmitter.

## PRODUCT HIGHLIGHTS

- ▶ a stripped-down version of Advanced. Unnecessary pages are removed, no analysis features. Remaining features are identical to those in Advanced.
- ▶ able to start itself to acquire data from sensors in a predefined manner. Suitable for unmanned plants and process conditions
- ▶ program supports Visilab's all process sensors and meters
- ▶ very easy to use
- ▶ multitasking program structure. Most tasks and operations can be performed at the same time
- ▶ supports eight slave meters simultaneously plus one primary slave, settings saved including the mission of each meter and its model. Different signal types can be acquired together, like moisture and gloss
- ▶ can be left running for months, data is saved automatically into date-time coded files
- ▶ the **AdvancedLE** program is licensed with an economical single-time payment
- ▶ the program can be later simply upgraded via internet with no cost
- ▶ 30 day evaluation licenses free, low cost short term licenses available
- ▶ operates in Windows Vista/2000/XP and future systems
- ▶ the new high-speed serial port is supported
- ▶ user's guide in English

2008-38
